## **Technical Specifications**

### BW900-2

#### High performance at an affordable price

BOMAG's ride-on, tandem vibratory roller, the BW900-2, offers the features and benefits of our larger rollers in a smaller package. Equipped with a 18 hp Honda engine, this unit provides 3150 lbs centrifugal force to enhance productivity. Features such as the heavy duty articulation joint, Spring-Applied, Hydraulically-Released (SAHR) brake system, vibration isolated engine mounts and much more contribute to it's strength and durability. Additionally, the combination of compact size, maneuverability and minimal lateral overhang makes it ideal for working in confined areas. The versatility of the BW900-2 makes it the perfect choice for a wide range of both soil and asphalt compaction applications.

#### Applications:

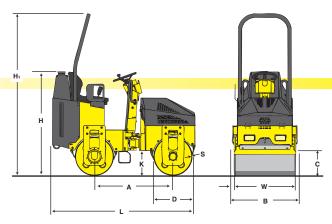

- Granular sub-base compaction
- Walk, bicycle and cart paths
- Driveways
- Parking Lots
- · Road rehabilitation and patching

#### Standard Equipment

- Hydrostatic travel and vibration drives
- Travel drive in series
- Bolt-on oscillating/articulation joint
- Hydrostatic articulated steering
- Spring-Applied, Hydraulically-Released (SAHR)
- parking brakes on both drums
- ✓ Vibration control in travel lever
- 2 scrapers per drum
- ✓ Plastic water tank
- Gravity sprinkler system
- ✓ Hour meter / Fuel level indicator
- Control and warning indicator lights
- Automatic shutdown at low oil level
- Lockable engine cover
- ✓ Vandal protected instrument panel
- ✓ Transport lifting points front/rear/central
- ✓ Emergency stop button
- Corrosion and weather protected ignition switch
- ROPS with seat belt
- ✓ Back-up alarm

#### **Optional Equipment**

- Headlights front and rear
- ☐ Hinged ROPS
